

Bhavesh Vyas

TECHNICAL LEAD | FULLSTACK ARCHITECT | ENGINEERING MANAGER

React.js · Next.js · Node.js · Angular · AWS · Microservices · AI/LLMs · Healthcare Technology

Pune, India · Open to Remote +91 8983155624 bhaveshvyas007@gmail.com linkedin.com/in/bhaveshvyas007

EXECUTIVE PROFILE

Fullstack Technical Lead and Software Architect with 12+ years of engineering experience delivering enterprise web platforms, distributed systems, cloud-native services and AI-enabled products. Experienced in leading 8–10 engineer squads, owning architecture decisions, modernizing legacy platforms and partnering across product and engineering functions. Deep hands-on expertise across React, Next.js, Angular, Node.js, TypeScript, MongoDB and AWS, with additional production experience in Generative AI, OCR, WebRTC/SIP, mobile applications and Java/Python services. Strong domain experience in healthcare technology, EHR, Remote Patient Monitoring (RPM), Chronic Care Management (CCM) and high-concurrency SaaS.

CAREER HIGHLIGHTS

12+ Years Engineering	8–10 Engineers Led	99.9% Platform Availability	8+ Years React	12+ Years Node.js	AI Bedrock / LLMs
--------------------------	-----------------------	--------------------------------	-------------------	----------------------	----------------------

CORE EXPERTISE

Architecture & Systems Microservices, micro-frontends, monorepos, Nx, serverless architecture, event-driven design, REST APIs, GraphQL, distributed systems and scalability.	Frontend Engineering React.js, Next.js, Angular v2–v19, TypeScript, RxJS, NgRx, Redux Toolkit, Tailwind CSS, SSR and enterprise SPAs.
Backend & Real-Time Node.js, Express, NestJS, Python, Java, WebRTC, SIP Telephony, Mizu-VoIP, Socket.io and real-time application architecture.	AI & Intelligent Automation AWS Bedrock, Generative AI, LLM integrations, Tesseract OCR, Google Cloud Vision and intelligent document/data workflows.
Cloud, DevOps & Data AWS Lambda, API Gateway, S3, CloudWatch, GCP, Docker, CI/CD, MongoDB, PostgreSQL, MySQL and Firebase.	Mobile & Visualization React Native, Flutter, Dart, JointJS, D3.js, DAG visualizations and interactive data-driven interfaces.

PROFESSIONAL EXPERIENCE

Procle Healthworks Technical Lead & Senior Fullstack Engineer Atlanta, GA · Remote — Pune	Jan 2025 – Present
- Own technical direction for a cross-functional squad of 8+ engineers delivering enterprise Remote Patient Monitoring (RPM) and Chronic Care Management (CCM) SaaS capabilities. - Drive frontend modernization with React.js and Next.js, including server-side rendering patterns and scalable application architecture. - Architect distributed Node.js microservices and AWS Lambda services supporting fault-tolerant healthcare data exchange and business workflows. - Integrate AWS Bedrock into clinical review workflows to generate automated patient trend insights and support intelligent healthcare workflows. - Designed and delivered a low-latency in-browser consultation platform using WebRTC and SIP telephony technologies. - Established CI/CD practices, automated unit and integration testing, and linting quality gates supporting 99.9% platform availability.	
Dentine Technologies (Tab32) Senior Fullstack Engineer Remote	Dec 2022 – Jan 2025
- Delivered mission-critical capabilities for a cloud-native Dental EHR and patient engagement platform. - Led migration from legacy modular repositories to an Nx Monorepo using Angular 18, shared UI libraries and improved CI workflows. - Developed and optimized Node.js services deployed behind GCP load balancers, improving backend scalability and service reliability. - Optimized MongoDB aggregation pipelines and indexes for high-volume healthcare and dental workflows. - Implemented schema validation and data governance across dental billing, scheduling, charting and patient workflows.	

PROFESSIONAL EXPERIENCE — CONTINUED

Humane Bits Technologies

Oct 2020 – Nov 2022

Senior Fullstack Engineer

Pune, India

- Built core customer, vehicle purchasing and inventory workflows for Kavak, a large-scale automotive technology platform.
- Delivered enterprise web applications using Angular, GraphQL, Node.js and AWS serverless services including API Gateway, Lambda, S3 and MongoDB.
- Developed reusable shared component libraries and strengthened engineering standards across a multi-tenant monorepo.
- Contributed to code review practices, application architecture and scalable frontend/backend development across product teams.

NeoSOFT Technologies

Dec 2016 – Oct 2020

Senior Software Engineer / Module Lead

Pune, India

- Led development of Ziprad, a healthcare AI and document-extraction platform combining Node.js, Python, Tesseract OCR and Google Cloud Vision API.
- Built ItelBPO Webphone, a browser-based VoIP/contact-center application using React.js and Mizu-VoIP with live transfers, multi-agent calling and call logging.
- Developed Wotznear using React.js, Node.js and AWS Lambda, with Flutter mobile application capabilities and serverless backend services.
- Delivered Inferyx data-pipeline visualization experiences using JointJS and D3.js, including DAG and force-directed visualizations integrated with Java backend services.
- Contributed to module architecture, technical decisions, code reviews and delivery coordination across multiple enterprise products.

NoeticIdeas Technologies (Accrualify Inc.)

Jan 2016 – Nov 2016

Software Engineer

Nagpur, India

- Developed Angular-based accounting workflows and dynamic financial ledgers supported by REST APIs integrating Ruby on Rails and Java services.
- Built reusable frontend modules and contributed to enterprise application architecture and API-driven workflows.

SELECTED ARCHITECTURE & ENGINEERING IMPACT

Healthcare SaaS Architecture

Designed and evolved distributed systems supporting RPM, CCM, EHR and patient engagement workflows.

Platform Modernization

Modernized legacy frontend structures through React, Next.js, Angular, Nx Monorepos and shared component architectures.

Cloud & Serverless

Designed AWS Lambda, API Gateway, S3 and GCP-based services with scalable API and data architectures.

AI Enablement

Applied AWS Bedrock, LLM integrations and OCR technologies to clinical review and intelligent document-processing workflows.

Real-Time Communications

Built browser-based consultation and contact-center experiences using WebRTC, SIP, WebSockets and VoIP technologies.

Engineering Leadership

Led squads, mentored engineers, established technical standards and strengthened delivery quality through automated practices.

TECHNOLOGY STACK

Languages	JavaScript, TypeScript, Python, Java, Dart	Frontend	React.js, Next.js, Angular v2–v19, RxJS, NgRx, Redux Toolkit, Tailwind CSS, SSR
Backend	Node.js, Express, NestJS, REST APIs, GraphQL, WebRTC, Socket.io, SIP / VoIP	Databases	MongoDB, PostgreSQL, MySQL, Firebase
Cloud	AWS, Lambda, API Gateway, S3, CloudWatch, Bedrock, GCP	DevOps	Docker, CI/CD, automated testing, linting, quality gates, release workflows
AI / Data	AWS Bedrock, Generative AI, LLM integrations, Tesseract OCR, Google Cloud Vision, JointJS, D3.js	Mobile	React Native, Flutter, Dart

LEADERSHIP & DELIVERY

Team Leadership Squad leadership and mentorship for teams of 8–10 engineers, with focus on technical growth and delivery ownership.	Architecture Technical RFCs, system design, API design, architecture reviews, scalability planning and technology decisions.
Agile Delivery Sprint planning, estimation, backlog collaboration, code reviews, release coordination and cross-functional delivery.	Engineering Excellence Automated testing, linting, CI/CD quality gates, reusable components, engineering standards and maintainable codebases.

EDUCATION

Bachelor of Computer Applications (BCA) Nagpur University, India
--

PROFESSIONAL FOCUS

Technical leadership, scalable fullstack architecture, cloud-native platforms, enterprise frontend modernization, healthcare technology, AI-enabled applications, distributed systems and engineering team development.
